

NFU Scotland Member Referral Scheme

I'm part of NFU Scotland because together we have a stronger voice, in Parliament, and in the media. The more of us there are, the louder that voice gets. If you care about the future of Scottish farming, I really think you should join us.

- **NFUS gives us a voice where it counts.** Whether it's fighting damaging tax changes, supporting sustainable payments, or holding retailers accountable - NFUS is constantly lobbying on behalf of Scottish farmers and crofters.
- **Stronger membership means stronger influence.** The more members we have, the louder our voice becomes. A bigger membership means greater political influence, stronger negotiating power, and a union that cannot be ignored by policymakers, retailers and regulators.
- **It's not just about lobbying - it's about backing each other.** From legal help and training to advice and community, NFUS stands with us through challenges like flooding, labour shortages, and market pressures.
- **It's good business.** You get trusted representation, direct support, and access to exclusive savings and advice that can pay for the membership several times over.
 - **One of our most powerful and practical benefits right now is the UK Fuels Card** - and it's a game-changer. Members are regularly saving 15p per litre on diesel - over the course of a year that adds up to hundreds of pounds back in your pocket. With no contracts, no account fees and no card charges, this fuel card offers real, everyday savings for farmers, crofters and rural businesses across Scotland. It's accepted at over 7,200 fuel stations, including major brands like Shell, BP, Esso, Morrisons, Tesco, Sainsbury's, Texaco, Applegreen and more.

- **Now's the time.** With so much change ahead - from agricultural reform to inheritance tax – now is the time for a united front.
