

SAC Consulting

SAC Consulting are delighted to collaborate with the NFUS on this important venture. Our role will be twofold;

- to assist participants to assess if a joint venture form of farming is the correct path; and,
- to support participants to arrive at an optimum long term solution that suits their needs and aims.

An initial technical and business assessment will be used to test ideas.

If viable, then SAC will assist applicants to establish a mutually agreeable business case, for development into a legal document by others.

Our role will be to give participants the initial answers they need to develop their plan as well as the detail to make it work long term.

To support this initiative SRUC will provides services at a discounted rate appropriate to both NFUS members and SAC subscribers.
